# Unit 3 Open Response Assessment
## A Subtraction Strategy

Grace solved 12 − 7 this way:

"I started at 12 and took away 2 to get to 10. Then I took away 5 more. I ended up at 5. So, 12 − 7 = 5."

Grace solved 13 − 4 this way:

"I started with 13 and took away 3 to get to 10. Then I took away 1 more. I ended up at 9. So, 13 − 4 = 9."

Show and explain how to use Grace's subtraction strategy to solve 14 − 8.
